Swopblock Investors,

Welcome to our Q4 2025 Use-of-Funds update. This quarter has positioned Swopblock for a strong 2026 ICO and app launch by delivering four key milestones: developing the app interface on .NET MAUI 10, launching a completely rebuilt website, filing our patent application, and embedding SWOBL (our crypto) into our business plan. With these foundations locked in, the runway is built... let's get into the details.

– The Swopblock Leadership Team

Our Q4 2025 Traction

01

App MPV UI developed for .NET MAUI 10

- ◆ With .NET MAUI 10 we write one codebase in C# and XAML that runs natively on iOS, Android, Windows, and macOS: no duplication, way faster development.
- ◆ A single codebase means we spend way less on dev, testing, and updates, while keeping everything consistent across all platforms.

02

Launched a completely rebuilt Swopblock.com

- ◆ Site overhauled for a robust, investor-focused experience: highlighting our roadmap, core protocol tech, patent progress, app preview (iOS and Android store availability—soon), development tools, coming ICO, press package assets, and more!

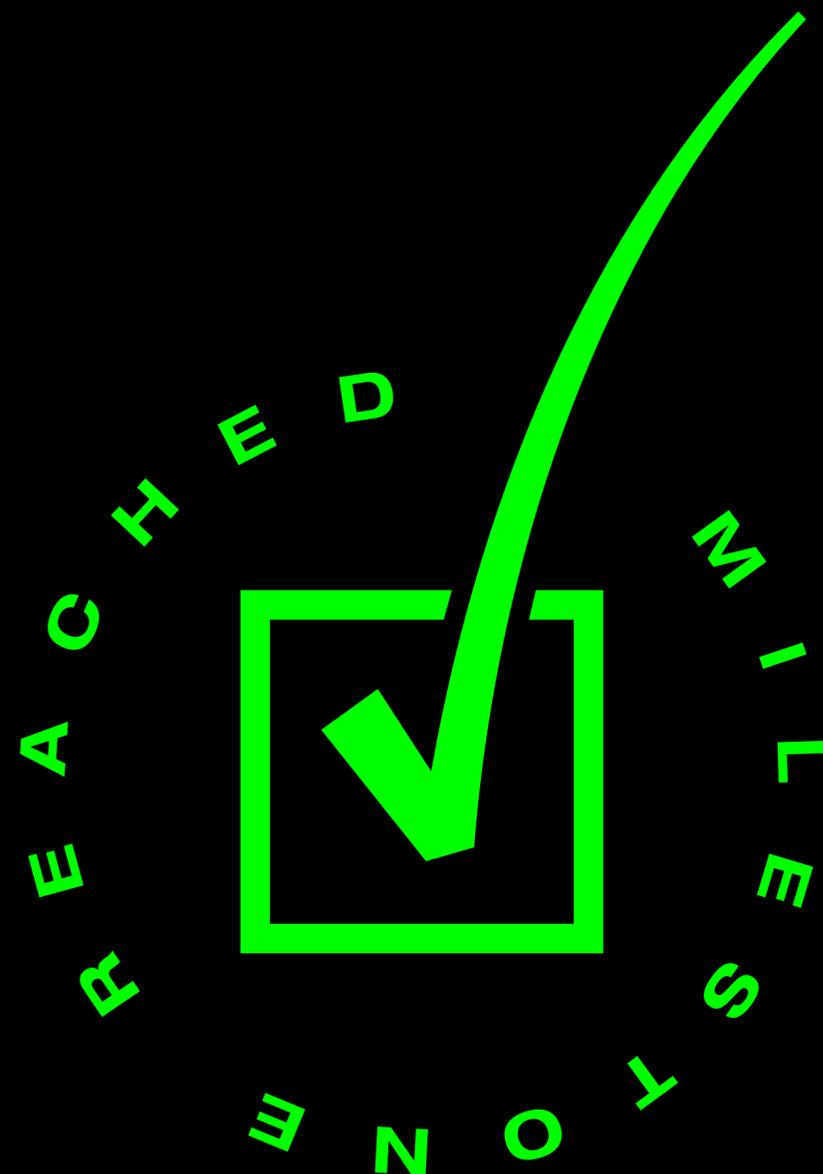

03

Patent Filed: “Monetary System of Exchange”

- ◆ Delivering the first detailed public evidence of our innovative monetary protocol.
- ◆ Showcasing the technical backbone of Swopblock.
- ◆ Expected patent approval & issuance: Mid-2026... **THIS YEAR!**

04

Business Plan SWOBL Integration

- ◆ We've bound our cryptocurrency (SWOBL) directly to our GAAP-compliant company accounting.
- ◆ You'll see this show up in our 2025 Financial Review and Audit, available end of Q1 2026.

Immediate Roadmap

01

**MVP User Interface
Video Preview**

02

**MVP User Interface
Available for Download**

03

**White Paper Refresh
& Development**

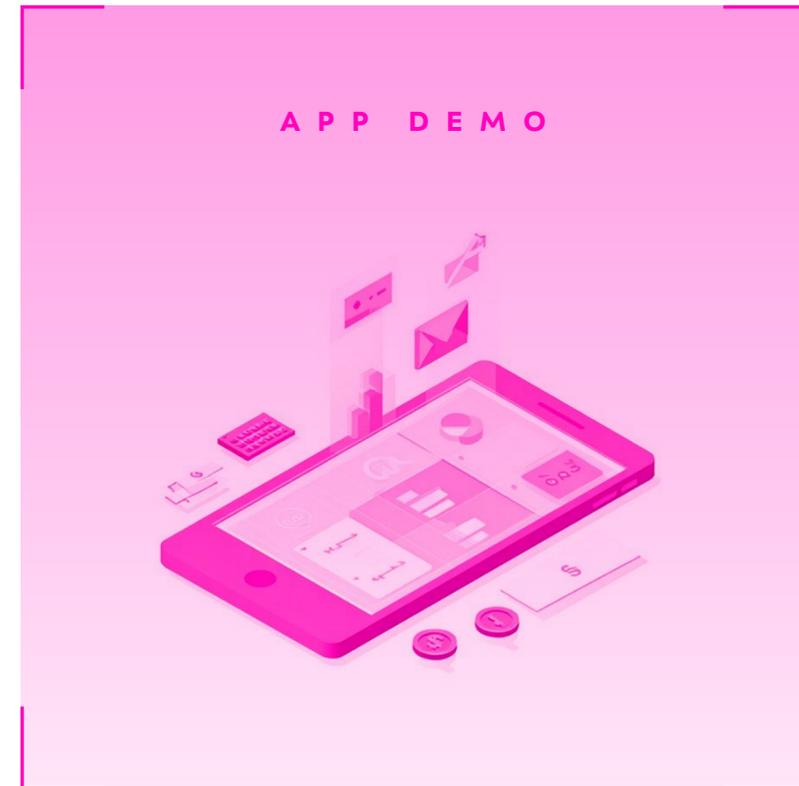

Our 2026 Vision: Recap

Your downloadable demo of our app is incoming!

We're on track to release a downloadable demo of our app in 2026, hitting both the Apple App Store and Google Play Store.

This isn't just software—it's the gateway to our full ecosystem, demonstrating our protocol's potential in the area of crypto exchange.

Swopblock's monetary protocol is dawning.

2026 marks a pivotal year for our protocol: With our patent filed and protocol design finalized, we're laser-focused on completing development—the final push toward launch.

This milestone isn't just thrilling; it positions us to ignite widespread excitement, drawing in not only crypto investors but also the open-source developer community.

We're securing your stake in Swopblock's innovation.

We're on track for patent issuance in 2026! How? We've qualified for expedited review, "Track 1" [37 CFR § 1.102(e)], which has historically delivered approvals in months, not years!

Securing our IP this swiftly will safeguard our innovation while unlocking full transparency for open-source collaboration and investor confidence.

Incoming regulations will be rocket fuel for SWOBL.

The Clarity Act's passage through the House sets the stage for Senate review and a potential vote as early as Q1 2026.

Once enacted, it'll pave the way for our official ICO, attracting crypto enthusiasts and establishing SWOBL's formal launch and market price.

**We're actively converting your support into solid milestones.
We're beyond excited to launch our App and ICO this year!
Thanks for being with us every step of the way.**

– The Swopblock Leadership Team

How we'll get there...

We are seeking: \$618k

- ◆ Pre-Seed Round 2 via SAFE
- ◆ For Equity + Future Crypto
- ◆ To Finish MVP & Launch ICO
